---

### Equipment example for child protection [flat]

SCHUKO socket outlets with child protection ensure that the little ones can't get hurt while they play. They offer increase contact protection and are recommended for the entire flat. For example, for a flat with approximately 100 m<sup>2</sup>, 25 SCHUKO socket outlets can be considered standard equipment.

#### Scope of supply

- 25 SCHUKO socket outlets with child protection
- 

### Equipment example for fire protection [single-family house]

The Gira smoke detector modular/VdS offers the advantage that it can be networked with other smoke detectors of the same kind. If a connected device detects smoke, all other smoke detectors also sound the alarm. This draws attention to smoke development even in the more remote areas of the house. Equipment of the house with smoke detectors/VdS in the living room, dining room, bedroom, office, nursery, hallway and cellar, which are all networked with cables.

**Scope of supply:**

- 7 Gira smoke detectors/VdS suitable for networking
